CORE SKILLS

- Angular · TypeScript · RxJS
- NestJS · Node.js · TypeORM
- Java · Quarkus
- REST APIs
- Design Systems
- Front-End Architecture
- Docker · Kubernetes · CI/CD
- PostgreSQL / MongoDB
- Testing: Jest, Cypress, Playwright
- Data Visualization / BI
- Git · GitHub · GitLab
- Agile Methodologies

EDUCATION

Estácio
Associate Degree, Internet Systems
2021 – 2023

UNIASSELVI
Bachelor's Degree, Physical Education
2018 – 2019

Centro Universitário de João Pessoa
Teaching Degree, Physical Education
2014 – 2017

LANGUAGES

Portuguese — Native
English — Intermediate

PATRICK CHAVES

FULL STACK DEVELOPER · ANGULAR + NODE/NESTJS/JAVA

Angular | TypeScript | Node.js | NestJS | Java (Quarkus)

Full Stack Developer with 5 years of experience, combining solid Angular frontend work with backend development in Node.js, NestJS and Java (Quarkus). Experience across banking, government and retail systems, leading agile teams from architecture through delivery. Comfortable moving between the interface and the API behind it.

PROFESSIONAL EXPERIENCE

Stefanini Brasil — Full Stack Developer (Angular + Java/Quarkus) Dec/2023 – Present
João Pessoa, PB — Remote · Banking

- End-to-end development on the profitability analytics platform of one of the largest banks in Latin America: Angular frontend and Java/Quarkus service layer.
- Frontend: data-dense tables (management P&L, clients, portfolios), two-tier filter architecture and organizational drill-down.
- Backend: REST APIs in Java/Quarkus consumed by the frontend, with a focus on financial formatting and business rules.
- Work across a codebase spanning AngularJS to Angular 15+, inside the client's proprietary design system.

Chaves Solutions — Founder & Tech Lead Mar/2024 – Jun/2026
João Pessoa, PB · Software consultancy, alongside full-time role

- Technical leadership of a 3-to-6 developer team, from architecture through delivery, across frontend and backend.
- Main client: Grupo Parvi (120+ dealerships, 14 states). Backend in NestJS and Node with TypeORM; frontend in Angular.
- Shared design system libraries and Angular version upgrades on long-lived codebases.

Vox Tecnologia — Software Engineer III — Frontend & Architecture Jul/2023 – Dec/2023
João Pessoa, PB · Govtech

- Sigfácil, the state-level REDESIM integrator: Angular codebase deployed as 11 state portals, consuming a PHP backend (Symfony/Zend) via REST.
- Took test coverage from 0% to 90–95%, sustained through refactors.
- Delivered the new public portal, the single-window registration flow and the new digital signer.

Vox Tecnologia — Frontend Engineer II (Angular) May/2022 – Jul/2023
João Pessoa, PB

- Delivered features across Sigfácil modules, consuming Symfony REST APIs.
- Complex multi-step forms and stateful registration flows.

Vox Tecnologia — Frontend Developer (Angular) Sep/2021 – May/2022
João Pessoa, PB

- Built screens in Angular 6+ integrated with a Symfony/Zend backend via REST and server-rendered templates.

Full Stack Developer — PlacarVolei (personal project) Nov/2019 – Sep/2021
João Pessoa, PB · Personal project

- End-to-end solo build: React/Next.js frontend, Node.js backend with MongoDB, real-time sync via Socket.io.
